

Recapped of Zoom Call on 24 Feb 2019 (ISY5001)

Machine Reasoning

Persons involved:

Chad Ng

Sun Hang

Jin Xing

Dong Bin

Li Xin

Points Covered:

Today, we covered the time line and the initial high level process flow diagram.

- 1) Noted that I will add in more details to the process flow diagram as feed backed by Dong Bin and Sun Hang.
- 2) Jin Xin raised the point that he would like to use MS SQL express for the database store. It is fine as long as this can be back up to shared with Sun Hang as he is also working on the coding parts. And there is no issue with setting it up on AWS windows server.
- 3) Sun Hang highlighted that we should have a clear target to complete the web development so that the scenario cases can be documented. All Agreed. Chad also commented that most likely We will need to completed up to about 90% by 2 Mar. If not, we will need to meet also on 3 Mar to complete any outstanding tasks.
- 4) Videos may be taken on 2 Mar.
- 5) Alex confirmed he has with-drawn from the course.
